

## Typ "L-P"

| Artikelnummer | Leiterquerschnitt (mm <sup>2</sup> ) | Leiterquerschnitt feindrähtig (mm <sup>2</sup> ) |
|---------------|--------------------------------------|--------------------------------------------------|
| L03-P         | 0.25 - 1.5                           | 0.25 - 1.5                                       |
| L06-P         | 1.5 - 2.5                            | 1.5 - 2.5                                        |
| L1-P          | 4 - 6                                | 4 - 6                                            |
| L2-P          | 10                                   | 10                                               |
| L3-P          | 16                                   | 16                                               |
| L5-P          | 25                                   | 25                                               |
| L7-P          | 35                                   | 25 - 35                                          |
| L10-P         | 50                                   | 35 - 50                                          |
| L14-P         | 70                                   | 50 - 70                                          |
| L19-P         | 95                                   | 70 - 95                                          |
| L24-P         | 120                                  | 95 - 120                                         |
| L30-P         | 150                                  | 120 - 150                                        |
| L37-P         | 185                                  | 150 - 185                                        |
| L48-P         | 240                                  | 185 - 240                                        |
| L60-P         | 300                                  | 240 - 300                                        |
