BOLTING TECHNOLOGY

Otto Schoch AG offers various screwdriving tools and solutions for industrial assembly. In modern assembly and industrial technology, the requirements are becoming increasingly complex and it is no longer just a matter of "tightening". It's all about measurability, reproducibility, torque-angle tightening, to name just a few. The application and the bolting process determine the choice of the appropriate screwdriving or torque tool. That is why a lot of emphasis is placed on the ergonomics and quality of the tools during their development. Otto Schoch AG thus offers a comprehensive product range from first-class manufacturers from all over the world. These products are developed in a constant exchange of ideas and know-how by professionals for professionals. Experience and passion go hand in hand in the design: this results in high-performance, reliable, safe, high-quality tools.

Torque screwdrivers

Torque Wrenches

Interchangeable heads

Impact wrench

Temporal clamp

IBAV extraction device

Digital torque tools

Rail disc saw

SCHOCH CALIBRATION CENTRE

The Schoch calibration service includes incoming inspection, basic cleaning, quality control, calibration including certificate.

Expert calibration and timely repair will help ensure the maximum operational life of your equipment, reducing overall costs in the long term. The documentation is done by means of a special test programme, which also graphically processes the measurement data.

REPAIR AND MAINTENANCE

Only tested products leave our company. Should you nevertheless have a problem with one of our tools, please contact us immediately.

In our service centre we repair all tools supplied by us. Our service technicians, who have many years of experience in the field of hydraulics, will be happy to carry out annual or periodic maintenance for you. This ensures and guarantees faultless function and a long service life.

Torque multiplier

Hydraulic torque wrench

Hydraulic cassette wrench

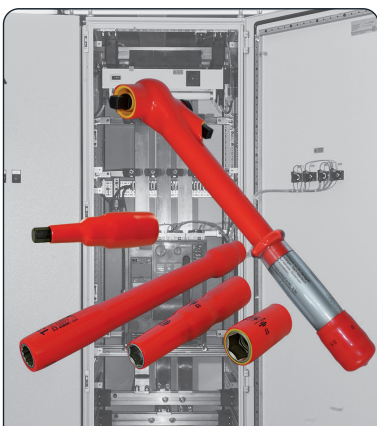

Bolt tensioning cylinders

Nut runners

Impact wrench

Isolated torque wrenches

Impact sockets

Nut runners

Our partners

Even more successful together is our motto, upon which we base selection and cooperation with our business partners. The customers of today have high expectations due to the wide range of products on offer. They are increasingly demanding tailored solutions. It is therefore even more important to have the right partners and to adopt a clear position together on the market.

ITH SCHRAUBTECHNIK

ITH is a world-leading system supplier of screwdriving technology. The company's product range includes hydraulic, pneumatic and electric screwdriving tools for tightening and loosening industrial screw connections.

TOHNICHI

TOHNICHI MFG. CO. LTD. is Japan's largest manufacturer of professional torque tools and test equipment.

CARL WALTER

The tools from CARL WALTER have stood for first-class innovative strength and quality since 1919. Today, the company is one of Germany's leading tool manufacturers with a range of over 13,000 items.

MOMENTO

Power socket inserts are the vital link between screwdriver and screw connection. MOMENTO has been specialising in their production for 70 years.

CEMBRE

CEMBRE SpA is one of the leading manufacturers of machinery for maintaining and servicing railway lines.

OTTO SCHOCH AG

Founded in 1964, the company has focused on the distribution of cable lugs and the special tools required for their processing. For many years, however, the bolting technology product range has also been constantly expanded in close cooperation with our partners. Thus, bolt tensioning cylinders, hydraulic torque spanners, torque spanners and wrenches and their accessories have been developed to meet the respective needs of the industry. This means ever more rapid changes as well as ever greater attention to operator safety and the protection of the environment. Today, service and training are just as important as sales. The entire product range is calibrated and repaired in our in-house calibration and service centre. Extraction tests in combination with grinding pattern analysis are also part of our service.

Expertise

Our long-standing, skilled and experienced employees in the fields of electrical connection, railway and screwdriving technology are our capital.

Innovation

Innovation lies at the heart of our work. We encourage our employees to think creatively. This allows us to devise impressive solutions for our customers.

Flexibility

Logistics solutions such as just-in-time deliveries based on framework contracts and demand forecasts, or the maintenance of minimum inventory levels, are a matter of course for us.

Customer focus

Special tool manufacture in accordance with customer specifications, as well as single-unit products and small-batch series, are also an integral part of our customer-oriented standard.

Quality is our basis for the trust of our customers. We are an ISO 9001 and 14001 certified company.
