ENERGY SUPPLY TECHNOLOGY

Otto Schoch AG offers various tools and solutions for industrial assembly. Requirements in modern energy technology are becoming increasingly more complex. It's all about safety, measurability, reproducibility and reliability, to name just a few. It is the application that determines the choice of tool. That is why Otto Schoch AG attaches great importance to ergonomics, safety and quality when selecting the tools it offers. These products are developed in a constant exchange of ideas and know-how by professionals for professionals. Experience and passion go hand in hand in the design: this results in high-performance, reliable, safe, high-quality tools.

Insulated hydraulic cutters

Cutting

Crimping

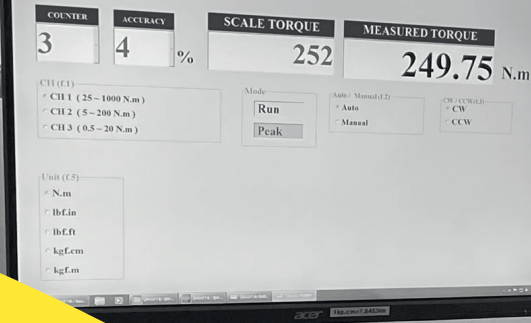

Hydraulic cutting heads

Hydraulic pressheads

Hydraulic pumps

Mechanical tools

Dismantling

SCHOCH CALIBRATION CENTRE

The Schoch calibration service includes incoming inspection, basic cleaning, quality control, calibration including certificate.

Expert calibration and timely repair will help ensure the maximum operational life of your equipment, reducing overall costs in the long term. The documentation is done by means of a special test programme, which also graphically processes the measurement data.

REPAIR AND MAINTENANCE

Only tested products leave our company. Should you nevertheless have a problem with one of our tools, please contact us immediately.

In our service centre we repair all tools supplied by us. Our service technicians, who have many years of experience in the field of hydraulics, will be happy to carry out annual or periodic maintenance for you. This ensures and guarantees faultless function and a long service life.

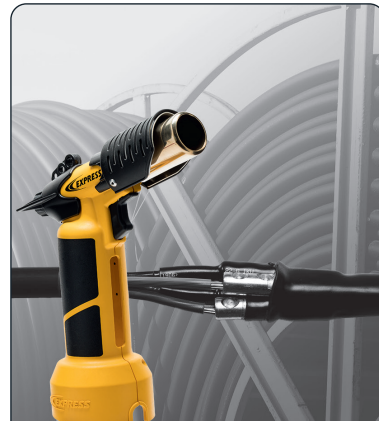

Printer

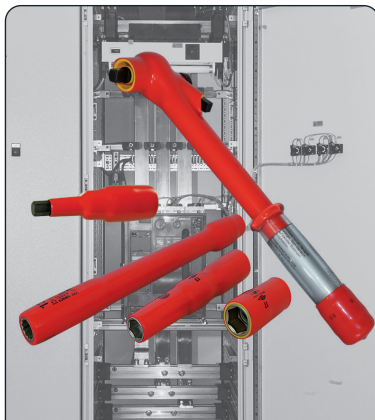

Cable identification inox

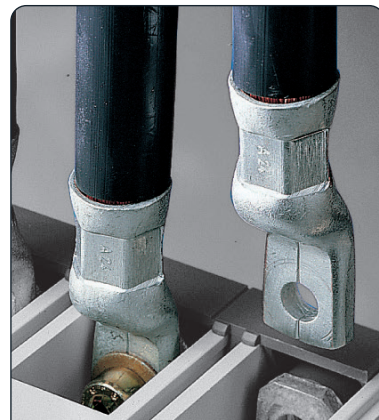

Heat gun

OTTO SCHOCH AG

Otto Schoch AG offers various tools and solutions for industrial assembly. Requirements in modern energy technology are becoming increasingly more complex. It's all about safety, measurability, reproducibility and reliability, to name just a few. It is the application that determines the choice of tool. That is why Otto Schoch AG attaches great importance to ergonomics, safety and quality when selecting the tools it offers. These products are developed in a constant exchange of ideas and know-how by professionals for professionals. Experience and passion go hand in hand in the design: this results in high-performance, reliable, safe, high-quality tools.

Know-How

Our capital are our long-standing, competent and experienced employees in the fields of electrical connection and fastening technology.

Innovation

Innovation is the heart of our work. We encourage our employees to think creatively. This is how we achieve convincing solutions for our customers.

Versatility

Logistics solutions, such as "just in time" deliveries, based on framework contracts and demand forecasts, or the management of minimum stock quantities are a matter of course for us.

Customer focus

Special tool designs according to customer requirements, as well as single piece production and small series are part of our customer-oriented standard.

Quality is our basis for your trust. We are an ISO 9001 and 14001 certified company.
