OTTO SCHOCH AG

Founded in 1964 the company focused on the sale of cable shoes, wire-end ferrules and cable connectors as well as the special tools required for their processing. There later followed supplementary in-house developments. Since the early 1960s, the product range for the electrical wholesale trade, the demands of industry and switch cabinet construction has been constantly expanded in close collaboration with CEMBRE. Today, for example, cable glands and cable protection products have become industry standard – as has our own cable-labelling system with a wide product range for industrial labelling. In our in-house calibration and service centre we calibrate and repair all tools supplied by us. Pull-out tests in combination with a microsection analysis are also part of our service.

Know-How

Our capital are our long-standing, competent and experienced employees in the fields of electrical connection and fastening technology.

Innovation

Innovation is the heart of our work. We encourage our employees to think creatively. This is how we achieve convincing solutions for our customers.

Versatility

Logistics solutions, such as “just in time” deliveries, based on framework contracts and demand forecasts, or the management of minimum stock quantities are a matter of course for us.

Customer focus

Special tool designs according to customer requirements, as well as single piece production and small series are part of our customer-oriented standard.

Quality is our basis for your trust. We are an ISO 9001 and 14001 certified company.

INDUSTRIAL APPLICATIONS

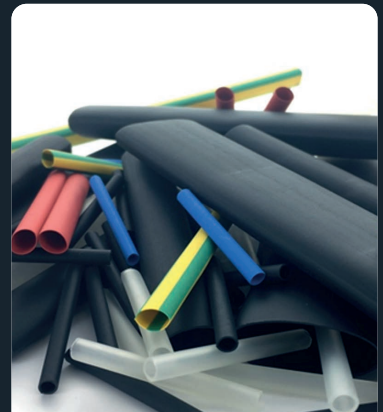

In addition to the large number of direct panel components, Otto Schoch AG supplies various solutions for marking and industrial identification of control panels, terminals, modular components and control cabinets. The thermal transfer printers enable the rapid marking of cables and other elements requiring identification. The range of products is particularly extensive for the control and switchboard construction sector. Therefore we are able to satisfy the different requirements of the individual application areas in the best possible way.

MG3 - Printer

Cable marking

Cable protection

Terminal block markers

ROLLY3000 - Printer

Labels

Cable glands

Cable bundling

SCHUCH EASY ORDER APP

The EASY ORDER APP is an in-house Kanban system of Otto Schoch AG. Scan the QR code, send the order, receive the goods - ordering has never been easier.

The Schoch EASY ORDER APP is the easiest way to handle your daily small parts orders quickly and efficiently. In consultation with the responsible sales representative you determine your assortment of Schoch articles you would like to order via the app.

You will receive labels with a QR code, which you attach to your storage bin. Once you see that one or more items need to be reordered, open the app, scan the QR code, enter the name of the ordering person, your order number and send us the order through the APP.

SCHUCH WEB SHOP

In addition to the EASY ORDER APP you can use of course our web shop too for quick and easy ordering. www.schochag.ch

Our partners

Together even more successful is our motto for the selection and cooperation with our business partners. Today's customers have high expectations due to the wide range of products and services available to them. More and more often they want individual solutions. This makes it all the more important to have the right partners and to position oneself clearly on the market together.

CEMBRE

CEMBRE SpA is one of the leading manufacturers of cable lugs, connectors and associated (mechanical, pneumatic and hydraulic) processing tools.

TOHNICHI

TOHNICHI MFG. CO. LTD. is the largest manufacturer of professional torque tools and test equipment in Japan.

ITH SCHRAUBTECHNIK

ITH Bolting Technology is the world's leading system supplier in screwdriving equipment. ITH's range of services includes the development, production of hydraulic, pneumatic and electric bolting tools for tightening and loosening industrial screw connections.

HELLERMANN TYTON

For more than 75 years HellermannTyton has been one of the leading suppliers of products for bundling, fastening, protecting and marking cables and wires as well as their connection components.

GLW

For 30 years GLW has been a reliable partner for cable connection equipment with wire end ferrules and innovative processing equipment.

MOMENTO

Impact sockets are the important link between the screwdriver and the screw connection. MOMENTO has specialized in their production for 70 years.

CARL WALTER

Since 1919, Carl Walter tools have stood for first-class innovation and quality. Today Carl Walter is one of the leading German tool manufacturers with a range of over 13,000 articles.
